athletic hall of fame

Introducing Stout's Athletic Hall of Fame

Ten athletic greats whose careers span 60 years and two administrators, who guided athletics at Stout during the formative years, will be inducted into the University's new Athletic Hall of Fame at ceremonies planned for Homecoming, Oct. 7.

"I consider the selection of these 12 charter members an important chapter in athletic history at Stout," said Mike Ritland, professor of education and psychology, and chairman of the selection committee. "This is a first step in a process to honor those who have provided athletic thrills through the years. Thirty-two athletes were nominated for inclusion in the Hall. The records of hundreds of others were considered. There were so many deserving candidates we had to weigh our selections carefully."

According to Ritland, the committee attempted to select athletes from different athletic eras. "It is difficult to compare the accomplishments of athletes from one era against those of another," Ritland said. "The games change. Rules change. Athletic techniques become more sophisticated. Some athletes concentrated on one or two sports while others were three and four sport stars."

Athletes selected and the eras they represent are: 1893-1925 Vern Damberg, football; 1925-45 Dave Stori, basketball and football; and Harley Hesselman, baseball and basketball; 1946-56 Gale Woelffer and Bob Young, both football and baseball; 1957-67 Glenn Harke, football, basketball, track and baseball; Mike McHugh, football and Mike Thompson, basketball and baseball.

The two administrators selected were Ray C. Johnson, athletic director for thirty-one years until his retirement in 1969, and Dwight Chinnock, faculty representative to the Wisconsin State University Conference for 29 years until his retirement in 1969.

Although an athlete must have participated ten or more years ago to be considered for selection, the Hall of Fame committee can waive that requirement. That was done in the case of Mel Coleman and John Peterson.

Coleman, who was graduated in 1969, was a NAIA first team All-American selection in basketball. Peterson, a wrestling standout and a 1971 graduate, was a gold medalist at the 1976 Olympics and a silver medalist at the 1972 Olympics.

Although Damberg, a retired teacher and coach who now lives in St. Paul, played 60 years ago, he established a kicking record that stands today--the longest field goal. No one has been able to match Damberg's record kick of 45 yards against Eau Claire in 1921. He helped lead the 1921 squad to a conference title, the first in the school's history. A quarterback and halfback, he was selected captain of the 1922 squad.

An outstanding athlete at Menomonie High School, Stori established a brilliant record at Stout where he captained both basketball and football teams in the early 1930's. He was a three-time all-conference selection in basketball and also made the all-conference squad in football from his end position. After his graduation from Stout in 1934, he played semi-professional basketball and established himself as a formidable coach, especially in track. Because of the many titles they won, his Richland Center High School squad gained a statewide reputation in track. Stori died in 1961.

Hesselman, who was graduated from Stout in 1947 and now serves as manager of the Mondovi Telephone Co., led the Blue Devils to conference basketball titles and the national basketball playoffs in Kansas City in 1942 and 43. He made the all-conference basketball team four times and served as captain of the Stout team in 1942, 43 and 47. Hesselman ranks 17th in all-time Blue Devil scoring with 829 points and ninth in scoring average with 13.8 points. He earned three letters in baseball. His career at Stout was interrupted by World War II when he served on a destroyer in the South Pacific. He is a past president of the board of directors of the Wisconsin State Telephone Association. He also served as president of the Mondovi Hospital board and headed up the hospital's fund drive.

Some of the passing records established by Woelffer, now head of industrial engineering for the American Can Co. plant in Neenah, may never be surpassed. Woelffer, who played on the tough Toni Storti teams in the post World War II era, once completed 19 of 20 passes in a game against Whitewater. As a freshman, he was an all-conference honorable mention selection and was all-conference the next three years. He gained 3499 yards passing during his career and threw for 42 touchdowns. He also lettered in baseball. Active in youth and community affairs, Woelffer served on the first human rights commission in Pennsylvania, co-chaired a campaign to build a \$3.5 million addition to Menasha High School and served seven years with the Neenah-Menasha United Way.

Young, a three-sports star, earned four letters in football and baseball and one in basketball. He was the most valuable player on the 1949 football squad and an all-conference selection in 1946 and 47 at halfback. He ranks tenth in scoring with 66 points and holds a University career kicking record with 30 of 39 points after touchdowns. Young has had a combined career in teaching, coaching and officiating. He teaches building construction at Loves Park, Ill., where his students have built and sold eight homes. He serves as president of the Midwest

Officials Association and also was selected to officiate an Illinois state tournament football game.

Harke, a junior high school teacher in Anoka, Minn., won nine letters in four sports at Stout during a distinguished career that saw him selected captain in three sports, football, 1959 and 60; basketball, 1960 and 61; and track, 1961. He won all-conference honors three straight years in football and once in basketball. The Minnesota Vikings signed him to free agent contracts twice, but in both cases, his tryouts ended with the exhibition season. The former United Football League named him to their all-star team twice. Records point to Harke as Stout's second best ball carrier ever. He once returned a kickoff 102 yards.

Young

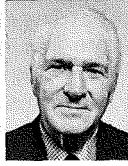

Harke

McHugh

Thompson

Johnson

Chinnock

Coleman

Peterson

No one ever carried a football further for Stout than McHugh. Almost every page of the record book carries his name. McHugh holds 20 game, season and career records, including most total yards gained--10,170, a remarkable figure. He was selected most valuable player on the 1965 championship team, gained the honor again in 1966 and was named captain of the 1967 squad. He made the all-district team twice in football and once as an outfielder in baseball. He accumulated four letters in football and two in baseball. McHugh, who lives in Excelsior, Minn., is a field salesman with Essex Group of United Technologies.

Thompson, who earned seven letters in basketball and baseball, is now supervisor of data and accounting for a division of the 3-M Co. in St. Paul. Thompson was the most valuable player in the 1966 basketball squad, a championship team. He was most valuable player and captain in 1967. Named to the all-conference team twice, he ranks third in career scoring with 1,191 points and ninth in average with 13.8 points per game. Many remember Thompson as "one of the University's best pitchers."

Coleman, who never played high school basketball, went on to win All-American honors at Stout, while leading the Blue Devils to a conference championship and the national playoffs in Kansas City in 1969. He was selected the most valuable player in the conference and the only Stout player to receive first team NAIA All-American honors. He was drafted by professional teams in both the NBA and ABA. He led the conference in rebounding in 1968 and 69 and

took the scoring championship with 338 points his senior year. He grabbed 38 rebounds in a game against Whitewater in 1968. His 306 rebounds and 19.1 rebound average are conference records. Coleman, a licensed psychologist, is working in psycho and behavior therapy and career development programs in Minneapolis.

Peterson won three Wisconsin State University Conference championships in wrestling before going on to become an Olympic medal winner in 1972 and 76. He continues to train and expects to participate in the 1980 Olympic trials. Honors gained on the way to the Olympics have been numerous. He was a member of the U.S. World Team in 1971 and 73; traveled to Russia and Poland on exchange teams in 1972, 73, 74

and 76; was a World Cup gold medalist in 1973 and 75 and AAU champion in 1973, 75 and 78. He has been active in Athletes in Action, a branch of the Campus Crusade for Christ. Although Peterson travels nationally with Athletes in Action, he calls Lancaster, Pa. "home" at the present time. He is a member of the NAIA Wrestling Hall of Fame.

Like Peterson, Johnson is also a member of the NAIA Hall of Fame. He was named athletic director of Stout in 1938 serving as NAIA District 14 chairman from 1952 to 1960 and area chairman from 1956 to 1960. As basketball coach, his teams won conference titles and playoff berths at the national basketball tournament at Kansas City in 1942 and

43. As football coach, his team won the conference title in 1941. In 1965, he was appointed to a two-year term on the Governor's Committee for Physical Fitness. He was responsible for overseeing the completion of Stout's field house -- later named Johnson Field House in his honor. Completed in 1963, it is considered one of the finest facilities of its kind. He was named to receive the NAIA National Award of Merit in 1967 for his long service to athletics and that organization. Johnson resides in Red Wing, Minn.

It has been said that the Wisconsin State University Conference would have disbanded if it were not for the work of Chinnock in holding it together. Chinnock was Stout's faculty representative to the conference, beginning in 1942. An outstanding athlete at River Falls, where he received his diploma in 1923, he came to Stout to teach industrial education in 1940. Two years later, he assumed the faculty representative responsibilities, serving as secretary of the conference for many years until a full-time commissioner was named. He was responsible for budget, scheduling, officials and records. He received a bachelor's degree from Stout in 1937 and a master's degree in 1941 from the University of Minnesota. He also has been nominated to the UW-River Falls Hall of Fame in recognition of his athletic accomplishments there.

Referring to the charter members, William Burns, athletic director, said: "The individuals selected have been instrumental in creating an excellent athletic tradition at Stout. The Hall of Fame is a public

Lab Simulates Third World Housing

A laboratory in Stout's Home Economics building, normally devoted to study the space arrangements of modern middle class housing, has been used to examine the crowded living conditions faced by much of the world's population. The laboratory can simulate the amount of space in which Third World families must live.

Employing movable styrofoam blocks, the students construct tiny rooms which, in some countries, may house families of 15 to 20 members.

"Traditionally, the space laboratory was built with the general study of middle class, middle American single-family housing," said Leland Nicholls, who teaches a course titled "Ecology of Habitat." The difference in what we are doing here is looking at other cultures and their use of space." He said he is attempting to give students a sense of what much of the world must tolerate, living in limited space environment. "I can go home and spread out into two stories of nearly 2,000 square feet of living space," he said. "What would I do if I had to go home and share less space with my sister and her family, my wife's sister and her family, her brother and his family and her mother and father under one roof?" Yet, he added, many families in the world must do this. "We have studied 8 by 8 rooms that would house a family of 15 or 20," he said. "One of the larger spaces we studied was 12 by 18. This would be very affluent squatter space."

Nicholls pointed out that in some parts of the world living space is so cramped that infants actually suffocate during the night "because they sleep in piles, masses of humanities."

Nicholls explained that it is important for Western cultures to understand Third World difficulties because

they have or eventually will have an effect on the West. For example, the effects of a burgeoning Mexican population is already changing the nature of bordering American cities.

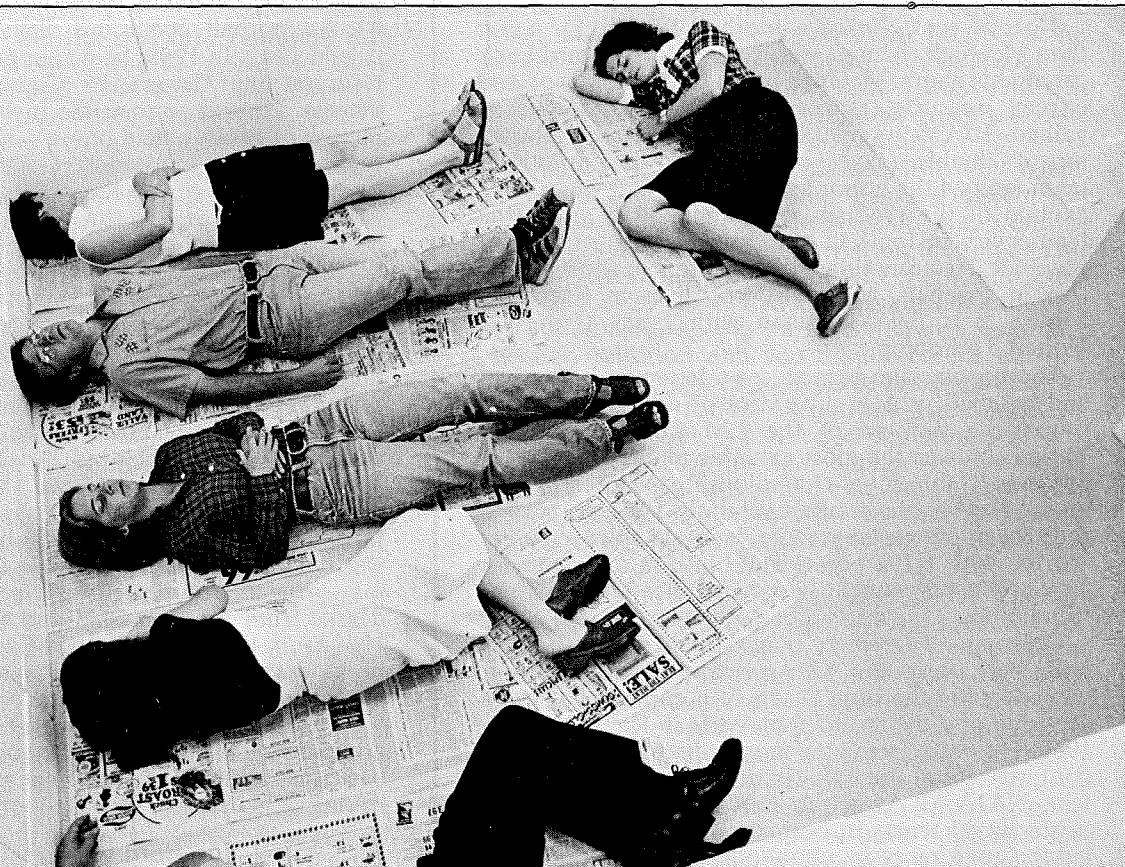

With limited space available to them, people of Third World nations must deal with problems such as how to cook, what to do with waste, ventilation and even how to sleep.

Students in the course are enrolled in various majors offered by Stout's School of Home Economics. "It is very important that they (the students) understand the use of space because the politics of this creates flows of people, migrations, world problems, wars and general chaos or a better quality of life," Nicholls said. "They must understand the use of space to understand what is taking place in Washington or Moscow or Johannesburg or Israel in the political and economic realm." He added that technologies are making the world seem smaller and thus there is a need for greater concern about remote populations.

He said Americans are going to have to change their attitudes about space. "In this country we can't spread out our homes and yards the way we used to," he said. "Builders are going to have to convert their thinking. We've got to rethink whether we want the wasted space we now have in our attics and basements."

Nicholls feels that students can better appreciate problems of space by duplicating it in a laboratory rather than reading it in a textbook.

"One student observed that this (the living in limited space) is like camping out with your family for the rest of your life," he said. "What I want them to learn is there are so many people living this way."

Students in lab simulation

Sarah Kaeiser

The Sky's The Limit For Her

A modern day Amelia Earhart landed here during the summer to attend a special aircraft construction course at Stout. Sarah Kaeiser flew her vintage 1948 Piper Vagabond more than 1,000 miles from Lake City, Fla. to Menomonie.

The 40-year-old science teacher and aircraft production worker said the solo flight took four days, with several stopovers, but no real problems. "I started out Friday (July 7) as early as I could despite the fog," she said. "I finally made it here by 8 a.m., Monday morning (July 10) just in time for class at Stout to start." The trip is the longest she has ever made by air. "I haven't even gone this far in a car by myself," she said. "So this is the farthest I've ever traveled."

When she announced her plan to make the trip, friends and relatives were at first a bit apprehensive. "My mother thought that something was going to happen to me for sure and that I would never come back," she said. "My father said he couldn't come after me if I was stranded somewhere." But Miss Kaeiser remained confident. "I said that I didn't think I'd ever get stranded, but if I did I'd just leave the plane, get a rent-a-car and come on," she said.

Miss Kaeiser spent an entire week planning, reviewing maps and checking out the plane. "The only part of the trip where I might have become a little uneasy was where there was bad weather and when this happened I would just put down at the nearest airport and check with the flight service station about what was going on ahead," she said. "This is what I thought would really slow me up and it did and I expected it so that is why I gave myself an extra day."

When asked to compare herself with Amelia Earhart, the legendary female pilot who disappeared in 1937 during an around-the-world flight, Miss Kaeiser said, "Amelia Earhart had a lot of financial backing. The only financial support I have is my own. This was my own idea and I saved up my money to do it."

Her main motivation for making the trip was to attend a three-credit course at Stout titled "Aircraft Construction Workshop." Participants in the course, mostly industrial education teachers, spend three weeks building a small, light airplane that eventually will be flown. She feels knowledge acquired at the workshop will enhance her work at Aero Corp., where she works on aircraft manufactured for the Air Force, Navy and Coast Guard. "I felt that attending this workshop would not only help me understand more about my own airplane, but also the type of work I do and the company I work for," she said. She also feels that this sort of activity can be useful in teaching science students. "I think that more science and industrial arts programs ought to get together and develop classroom projects in courses where students could actually do the work and

see the results of what they did with their hands," she said. "They can put part of themselves into the work and see the results."

The plane she owns, a model PA 15 Piper Vagabond was purchased for \$1,500. An additional \$3,000 was spent to restore it. Miss Kaeiser explained that the two-seat aircraft was originally designed during the Depression. "The Piper Aircraft Co. made this particular plane so that people would be able to afford a light, small aircraft of this type," she said. "Another reason, they had surplus materials at that time because people were not buying planes then." She hopes that the aircraft construction class will give her skills that enable her to do work on the plane herself, rather than having it hired done.

Kaeiser with her plane

Miss Kaeiser believes that any skepticism that may have existed in the past for female pilots is rapidly disappearing. "I think in small towns and out-of-the-way places, people tend to be more skeptical than in big cities," she said. But Miss Kaeiser said her own friends were skeptical of her plans to make the trip to Menomonie. "My friends just sort of thought that when I talked about the trip it was just a big dream and that's all it was going to be," she said. "But I said I was determined to give it a try and with my own money so I just saved up and went ahead and did it."

Developmentally Disabled It Was Their Very Own Conference

In most respects, it was like any other conference or workshop; a combination of learning and socializing. But there was one notable difference: all 343 participants were mentally retarded and developmentally disabled adults. Held on the Stout campus July 19 through 21, the conference may be the only one of its kind in the world. A form of college credit was even awarded, although many participants had little formal schooling.

All activities were selected and planned by adults with mental retardation and other developmental disabilities, such as epilepsy and cerebral palsy. Sponsors of "The Third Annual Conference of the Developmentally Disabled" included the Stout Vocational Rehabilitation Institute, the university's Office of Continuing Education, and Unified Industries of Dunn County, an employment center for adult handicapped.

Walt Pruitt, chairman of the Department of Vocational Rehabilitation at Stout, said the primary purpose of the conference was to give mentally retarded adults an opportunity to take command of their own lives. "This provides a forum where these people can really explore their capabilities and potential in a very unique situation," he said. "Secondarily, it provides an opportunity for the general public to understand the potential developmentally disabled people really have, because this puts these folks in a very new light, functioning independently in their own conference which they have planned, organized and implemented."

Those attending the meet paid their own way and selected offerings they wanted to attend. An illustrated brochure describing the various workshops was designed for those who cannot read.

Topics for the 15 workshops were developed by people who attended the meet, through three conference officers and a three-member advisory board, all consisting of mentally retarded adults. The group was also responsible for helping to compose letters of invitation, picking the theme for the formal banquet and serving as guides at the conference. In addition, they participated in "feedback" sessions after the conference to evaluate what was offered and to provide ideas for possible conferences that may be held in the future.

"There were a variety of subjects available ranging from a bicycle rodeo and music to things that help participants to be more independent, such as how to get a driver's license or how to get a job," said Christine Enger, associate director at Unified Industries. Among the other topics were dance, drama, first aid, outdoor cooking and woodworking.

Panel discussion was featured on the workshop about jobs. Participants, mostly developmentally disabled, described sources of employment information such as the State Job Service and newspaper ads. But emphasis was placed on developmentally disabled seeking and securing their own work. Some panel members described jobs they already held.

One participant from Superior said that he holds a part-time job cleaning a bar. "We vacuum and scrub the floors and we clean the bathrooms," he said. "We make about \$12 a week. We are making enough money." But he said some day he would hope to become a bartender. "I think I would be a good one," he said. Others spoke

of jobs in which they were self-employed and some described how they were still looking for work.

Volunteers in a workshop on beauty aids showed women how to apply makeup properly and then let them try it themselves.

A dance workshop was held in preparation of a "formal" dance scheduled as part of the conference. A variety of steps were covered ranging from ballroom to "disco" type dancing.

Information covered in a workshop on getting a driver's license included how to pass a written examination as well as tips on how to take the driving part of the test.

Participants who completed the conference were awarded one Continuing Education Unit, a form of college credit for adult learners who are not enrolled in regular degree work. "That's pretty neat; I didn't even go to high school," said Carolyne Callison, a client at Unified Industries, who served as conference secretary. "I was looking forward to this because I was going to learn new things and meet new friends," she said. "I think learning is a good thing for you."

Avis Wolske, director of Unified Industries, said that the social aspects to the conference, including a reception, two dances and a banquet, are also important. "This is partly to learn but partly to have fun," she said. "It's a combination of social events and work, just as in other conferences." She pointed out, for example, that it provides an opportunity to renew friendships formed in institutions by people who are now living at group homes in various communities. "In some respects, it's like a class reunion," she said.

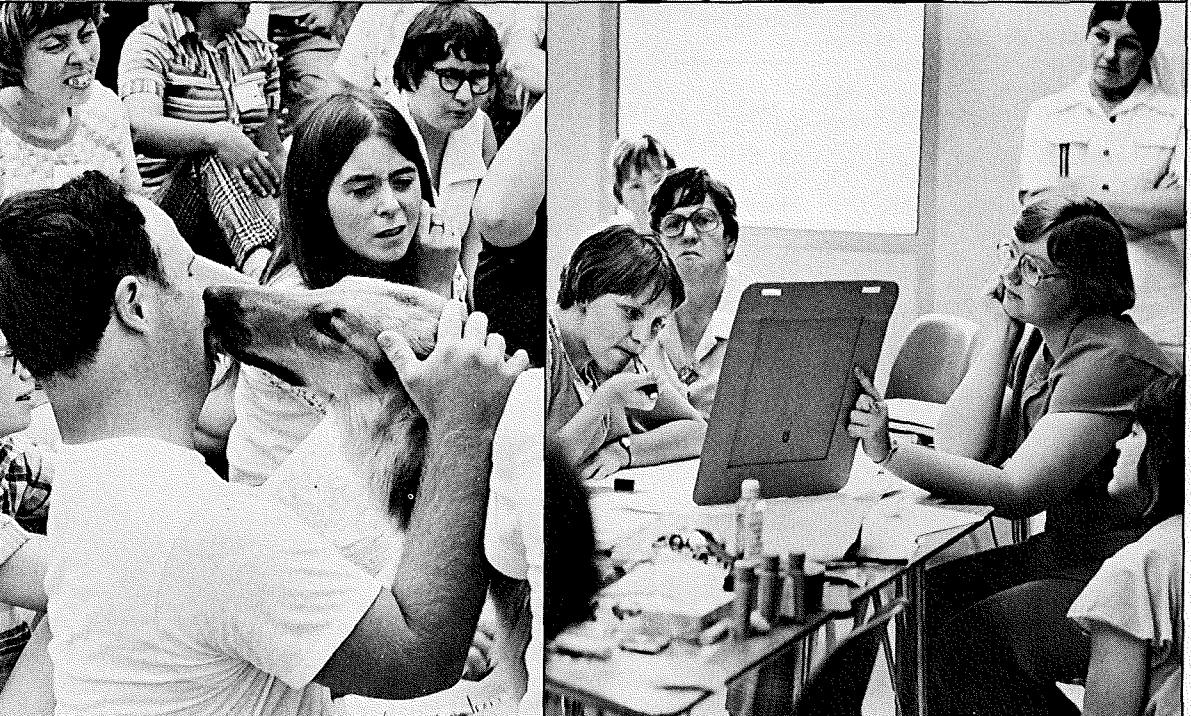

A limited amount of supervision was provided by professional staff members from regional centers where conference participants are being served. But emphasis was placed on freedom. "We hope this will serve to change staff attitudes by making them realize that their clients are capable of handling activities they thought they could never do," Wolske said. Mrs. Enger added that recognizing this is sometimes "hard for supervisors to learn to do."

Many of the participants came with their supervisors from day activity centers or with guardians. During the first day of the meet, some of the guardians and supervisors were apprehensive about leaving their charges to fend for themselves. But as time went on, they discovered that developmentally disabled adults really do have a considerable capacity to function independently.

"The conference gives supervisory staff a chance to see them in a different light," Mrs. Enger said. "After they see that they can handle it, they pull back and let them go."

Sponsors of the meet anticipated few special problems, and almost none occurred. "What comes across is that they (the mentally retarded) are much more capable of independent living than most people give them credit for," said Pruitt. "There are no more problems with this kind of conference than with any other kind."

Participants came primarily from Wisconsin and Minnesota, because facilities are limited. But Pruitt says he hopes to eventually see similar offerings develop in other states. "The uniqueness of the conference should be emphasized," he said adding, "But this is something other states could do."

Dance class (top), pet care, beauty aids

Class Notes

1931 - 1957

HARRY MERRILL BS '31, MS '48 celebrated his 50th wedding anniversary. Before his retirement, he was director of vocational education at Marinette.

RALPH E. BETTERLEY BS '35, MS '47 retired as director of education of the Cast Metals Institute of the American Foundrymen's Society after serving in that capacity for 20 years. His wife, **JANE ECKE** '41, is a manager in the pattern and fabrics department of Marshall Fields Co., Old Orchard, Skokie, Ill.

AGNES STEINKE RESELL '36 former UW-Extension home economist in Burnett County, has been promoted to the rank of instructor emeritus.

JAMES BREITZMAN '40 recently celebrated his 30th year of employment at First National Bank in Menomonie.

DARVEY E. CARLSEN BS '44, MS '46 is the author of a new book entitled "Communication: Graphic Arts." This is one volume of the Modular Exploration of Technology Series made up of 20 books designed to meet current needs of industrial arts teachers.

LENORE LANDRY '45 is a textile and clothing specialist from the University of Wisconsin-Extension.

The spotlight of national publicity focused on **STEWART** '46 and **MARY ENGEBRETTSON NORTH** '46 recently as their son Andy won the U.S. Open championship in June at Cherry Hills Country Club near Denver. Stu North has been education administrator in the School of Management at the University of Houston since 1969.

RAYMOND PITTMAN BS '48, MS '49 has received the Fraternal Insurance Counselor (FIC) designation and is a Lutheran Brotherhood district representative in Alexandria, Minn.

JACK R. BONGEY BS '49, MS '53, a guidance counselor with the Cincinnati Public Schools, is president elect of the Greater Cincinnati Personnel and Guidance Association.

WILLIAM M. SIREK MS '54 Fox Valley Vocational, Technical and Adult Education district director, has been named to the board of directors at Valley Western Bank, Greenville.

NYLA BOCK MUSSER BS '55, MS '74 Jackson County Extension home economist, has been promoted to the rank of professor.

RICHARD T. ANDERSON '57 is the district director for the Waukesha County Technical Institute.

CLYDE SUTTON BS '60, MS '66 is the guidance counselor at Big Foot High School in Walworth.

KIM BAUGRUD BS '61, MS '62 Extension coordinator of continuing education for Racine and Kenosha counties, has been promoted to the rank of professor.

KAREN JOHNSON BS '61, MS '62 has been hired as vice president of the consumer affairs department of the Borden Foods Division. She is Borden's first female vice president.

ARDALA E. LITTLEFIELD '61 northern area extension interior design and housing agent in Hayward, was recently promoted to the rank of associate professor in the University of Wisconsin System.

Introducing Sue Stephenson

Alumni will be seeing a new face at some of their get-togethers and reunions this year. It will be that of Sue Stephenson, who is serving as assistant director of Development and Alumni Services in UW-Stout's Affirmative Action Administrative Internship Program for 1978-79. Sue, who is on leave from the Counseling Center at Stout for the year, will be assisting director Jack Wile on a full-time basis in this one-year program. Applicants from five UW campuses and the UW System Central Office were considered for the position.

DANIEL G. AROLA '62 recently received his master's degree from the University of San Francisco. He is teaching math and is advisor for the school newspaper at Kit Carson Middle School in Sacramento, Calif.

LOUISE RESELD WAKEM '63 is the associate director of print production for Bank Marketing Association in Haymarket, Ill.

MYRNA A. CASTLEBERG BURI '63 was recently hired by Job Service to serve as summer youth coordinator in Ellsworth.

GORDON CLAY MS '64 is director of Cooperative Educational Services Agency (CESA) 6 in Spooner.

The Stout Alumnus

The Stout Alumnus is an official publication of University of Wisconsin-Stout. It is published quarterly.

John K. Enger Editor
Roberta Obermueller Ass't. to the Editor
Carol Richard Class Notes

The Stout Alumnus is distributed to graduates, friends and faculty of the University. It is entered at the post office Menomonie, Wis., as third class matter.

Jack Wile Alumni Director

MARY KAYE MERWIN '64 has been appointed associate director of educational programs and services for the National 4-H Council, Washington, D.C.

1965 - 1969

JOHN S. HANSON '65 is director of the U.S. Fish and Wildlife Service's Young Adult Conservation Corps for Idaho, Oregon and Alaska. He resides in Boise, Idaho.

MARVIN L. CLEMONS '66 is director of Cooperative Education, Linn-Benton Community College in Eugene, Ore.

LOIS NOYCE WOHLFEIL '66, a fulltime home economics teacher at Neillsville High School, will prepare a weekly column for the Clark County Press newspaper.

DWIGHT E. DAVIS '66 is executive director of the North Central Vocational, Technical and Adult Education District. Dwight resides in Wausau.

CAROL BERGHAMMER WISNEWSKI BS '67, MS '70 has been named 1978 Teacher of the Year in Wisconsin. Carol has been a home economics teacher at Stratford High School.

DAVID R. MANCUSI '67 is manager of Nekoosa Papers, Inc. in Port Edwards. David resides in Wisconsin Rapids.

DENNIS TESOLOWSKI BS '67, MS '68 has recently completed his doctoral dissertation entitled "Effects of a Job Readiness Training Program on Physically Handicapped Sheltered Workshop Employees."

BONNIE NIELSON WIGEN BS '68, MS '71, a home economist in Dunn County, has been promoted to the rank of associate professor.

MURRAY PATZ '68 is a sales engineer, EPS Systems Equipment, for Kohler General in Sheboygan Falls.

RONALD E. WITROW '68 is the new drafting instructor at the Northeast Wisconsin Technical Institute-Marinette campus.

PAUL H. WILTING '69 was recently elected to serve a two-year term as vice-president of the Wisconsin Driver and Traffic Safety Education Association.

1970 - 1971

JULIE K. ALM BS '70, MS '78 has accepted the position of Green Lake County interim Extension 4-H and youth agent.

JAMES BISHOP '70 is an industrial arts instructor at Big Foot High School in Walworth.

JOHN LUECK '70 teaches auto mechanics at Big Foot High School in Walworth.

WILLIAM PAUL SELBY BS '70, MS '71 graduated from Christian Theological Seminary, Indianapolis. He received the Master of Divinity degree.

ELLEN HAIN '71 supervisor of the applications department of the McCormick flavor division, has been elected secretary of the Maryland section of the Institute of Food Technologists at McCormick and Co., Inc.

WAYNE M. OWNES BS '71, MS '74 is the vocational evaluator at North Central Technical Institute in Wausau.

LYNN REICHERT MS '71, student services coordinator of the Wisconsin Indianhead Technical Institute-Ashland campus, was elected president of the North Wisconsin Lake Superior Guidance Association.

1959 - 1964

WILLIAM F. MARTIN '59 is a color cameraman at Associated Lithographers in Phoenix, Ariz. He is teaching an evening course in color theory and application at Arizona State University, Tempe, Ariz. under the direction of **ZEKE PRUST** '47.

PATRICK J. RENTMEESTER '71 has been promoted to field sales manager for the Wausau region of Employers Insurance of Wausau.

JUDY ROMMEL BS '71, MS '76 La Crosse County Extension home economist, has been promoted to associate professor.

1972 - 1973

JACK CAPELLE '72 has accepted the position of head basketball coach at Wisconsin Dells High School. Jack will also teach auto mechanics and industrial arts.

SUSAN HINTZMAN '72 is teaching kindergarten in Fort Atkinson.

LARRY LANGHORST MS '72 and his wife Pat, have purchased the Howells Journal newspaper in Howells, Neb.

GEORGE C. MACHT BS '72, MS '74 is the coordinator of the food and lodging program at College of DuPage. George was honored for outstanding performance as a classroom instructor.

GRAYDON L. STEENSrud MS '72 is a psychotherapist for Riverdale Marriage and Family Clinic, an agency of La Crosse Catholic Charities, Inc.

CYNTHIA WALLINTIN '72 has been promoted to manager of Maurices in the Shopko Mall in Beaver Dam.

MIKE WELSH '72 has been named manager at Senger Hardware in Portage.

PAULA WISNIEWSKI LYNN '72 is a muralist in New Berlin.

TOM BARBIAN '73 was responsible for all technical operations and the general conduct of Summerfest '78, Milwaukee's lakefront music festival.

BARNEY KLECKER BS '73, MS '76 recently won the sixth annual Syttende Mai 17-mile run at Grantsburg. Klecker also finished 36th in the 26-mile Boston Marathon held in April.

LYNNE RAASCH '73 is a consumer information specialist for Johnson Wax in Chicago.

SONJIA SHERMAN SHORT '73 is the home service advisor for Madison Gas and Electric.

VERNON STONE MS '73 has been the agriculture and industrial arts teacher at Alma High School for the past 21 years. He is also the advisor for the Future Farmers of America chapter.

WILLIAM S. WIEDNER '73 is assistant vice president of Thomas Bently and Son, Inc. of Milwaukee.

DAVE VANDE VOORT '73 is a teacher at Chilton High School who works with students in drafting and woodworking classes.

1974

KRISTEN ARNTSEN is the program supervisor for the Community Child Care Center in Sturgeon Bay.

DAVE CHRISTENSEN was grounds supervisor-technical director for Milwaukee's Summerfest '78.

KATHLEEN DUNEMANN is food service supervisor at the Golden Age Manor in Amery.

BRETT FERGUSON MS is a school psychologist for El Dorado County school system in Placeville, Calif.

Distinguished Alumni

Curry

Huntzicker

Jane Huntzicker (BS '44) and Estell H. Curry (BS '31) were presented the University's Alumni Distinguished Service Award during Summer Commencement ceremonies.

Curry, who resides in Wautoma, Wis. and Haines City, Fla., has devoted some 40 years with the Detroit Public Schools before retiring in 1969.

Miss Huntzicker, who lives in Yakima, Wash., is responsible for developing and coordinating the home economics program for transfer students at Yakima Valley College. FORREST J. NUTTER BS '40, MS '69, recently, in Rice Lake.

MARGARET SVARE '38, 62, June 21, in Deerfield.

CAROL M. PETERSON MS '67, 51, April 21, in Eau Claire.

GREG SCHUBERT

Greg Schubert, manager of Stout's Teleproduction Center, passed away suddenly this summer. He was a key individual in developing the award-winning Center at Stout. Friends are seeking to establish a scholarship in his memory and contributions may be made through the United Bank of Menomonie.

Hall of Fame

(continued from page 3)

reminder of these people and their accomplishments. Each of the charter members displayed unique and exceptional abilities. Their accomplishments did not stop with athletics, but reached into other fields."

The Hall of Fame was made possible by a grant from the Stout University Foundation. A permanent display will be located at the field house. Additional selections will be made each year.

The charter members will be honored at the annual Homecoming dinner this year. Tickets for that dinner are available through the Alumni office. Besides Ritland and

Burns, the selection committee included three staff members, who have responsibilities in athletics; a member of the "S" Club; three Alumni letter winners, Jack Capelle, Jack Hammond and Greg Mickelson; two Menomonie residents, Phil Johnson and Fred Flint; and a representative of the Alumni Association, Stan Lueck.

Glenn Steinbach, who recently received his master's degree in professional development, was responsible for researching the information the Committee used to make final decisions.

Campus Notes

A ten-year project to convert holdings in Stout's Robert L. Pierce Library from the Dewey Decimal System to the Library of Congress Classification System has now been completed, according to Joe Jax, director of Media Retrieval Services. More than one hundred thousand volumes have been reclassified, Jax said. In addition, one hundred thousand new volumes, purchased during the last ten years, have been classified under the Library of Congress System. Jax explained that the Dewey Decimal System has been used by libraries since the turn of the century. The Library of Congress System is a more efficient and specific means of classification. Jax noted that the conversion is a "milestone" for Pierce Library. Plans are now being made for the construction of a new \$6.2 million Library/Learning Center for Stout, with a target completion date of 1981.

* * * * *

An operating budget for Stout totaling \$29.1 million has been approved by the UW System Board of Regents. From that total, \$13.8 million will come from state tax revenues with the rest coming from grants, fees and self-supporting activities. Budget includes \$100,000 to help defray the cost of Stout's continuing enrollment increase. Target enrollment for next year is 6,664, up about 200 from last year. Salaries for Stout's 823 faculty, academic staff and classified employees total \$15 million. About \$9.6 million will go to supplies and services; \$3.1 million for fringe benefits; and \$1.2 million for equipment. Federal grants, gifts and contracts total \$4 million; \$4.7 million will be in tuition; and \$6.4 million will be in auxiliary enterprises and services.

Program at Stout Aids Honduran Schools

Industrial arts programs in Honduras are being assisted through a special Peace Corps project being carried out at Stout. Through a \$55,000 Peace Corps contract, seven volunteers who come from throughout the United States are being prepared to help Honduran junior high school educators develop and offer course work in industrial arts education.

Dick Gebhart, co-chairman of the department of industrial teacher education at Stout, said the trainees were selected because they already had background in technical areas such as woods, metals, drafting, electricity and power. Two-thirds of their work at Stout was in professional teacher education, with the remaining third devoted to technical courses. They were on campus from June 19 through August 21, followed by a two-day preparation period in Miami, Fla. Then they had a ten-week intensive training program in

Spanish, which took place in Honduras, Central America.

Gebhart said he has visited Honduras to study its educational system and that he and co-chairman Rich Peter have had extensive contact with the Peace Corps in an attempt to develop an educational program that meets the needs of Honduran schools. "The volunteers will be counterparts to Hondurans in that country's school system," Gebhart said. "The idea is to get Hondurans on their own feet in industrial education so they can operate on their own in the future."

Gebhart referred to the program as "an unusual experiment" since the volunteers do not have backgrounds in industrial arts education. The intensive training at Stout is expected to provide this. "With the least number of dollars possible, we are attempting to place these people in the Honduran schools," he said.

Gebhart pointed out that industrial education at the junior high school level in Honduras is especially critical, because in many cases students end their formal education at that point. "While the basis of industrial arts education in the United States at the junior high school level is to explore industry, down there it is an aid to getting a job," he said.

Gebhart said that Honduras ranks among the bottom three Latin American nations in per capita income. "They are struggling to get schools going and to establish some kind of formal education," he said. "But they have some of the same problems we do getting teachers, retaining teachers and keeping kids in school."

In addition to their work in schools, the volunteers will also assist the Hondurans in community-related projects.
